

Up the ante: Human rights and morality in the digital world

ABSTRACT (well, sort of): The presentation is intended to be an “upgrade” of the closing conference’s title (Privacy and Trust for Mobile Users), dealing with Privacy as a Human Right, Trust in terms of Morality and Mobile Users in terms of the, broader, Digital World.

At the same time, however, a step back will be taken, looking at each one of these terms from a distance, ie. from a comparative analogue-digital world perspective.
