

List of Multilingual FrameNet Dictionaries

The table lists the thirty-six languages in our resource FNWKxx with more than thousand translations. We also show the number of lexical entries and definitions in the respective Wiktionary language edition (as of January 2013). For around half of the languages, the target language Wiktionary has roughly ten times more lexical entries than extracted translations. We expect these to contain a target sense for a majority of the available translations.

Language	# translations in FNWKxx	# lexical entries	# definitions
Finnish	9333	108326	135339
Russian	7790	16201	25002
